

FROM CADAVER TO IMPLANT

Need Donated Human Cadaver Tissue?

PharmaSeed, a contract medical device developer, offers:

- ✕ Fully integrated cadaver services.
- ✕ Organs: more than 16 different types.
- ✕ Tissues & Fluids: Cerebral & spinal fluid, spine, vascular tissue, skin, musculoskeletal tissue.
- ✕ Large specimens (i.e. tissue blocks) for surgical training.
- ✕ Operating room facility & related services.

PharmaSeed alleviates the logistical burden: PharmaSeed has set up a medium-sized operating room facility that includes a basic set of surgical instrumentation. Additionally, PharmaSeed provides all necessary disposable clothing & supplies.

Special surgical instrumentation should be requested in advance.

Serological testing for infectious diseases is performed by CLIA-certified laboratories on all donors prior to distribution of tissue. Standard tests include: HIV I/II, Hepatitis B and C, Syphilis, HTLV I/II, CMV & EBV.
